Managed NaaS for ATMs

Network-as-a-Service solutions monitored and managed 24x7x365

Modern financial institutions require secure and reliable ATM experiences to keep their customers happy. With branch WAN getting increasingly more complex, and ATM security always top of mind, banks and credit unions are seeking solutions that can isolate ATM transport from the branch network and provide disruption-free, high-availability service.

Next-Generation ATM Transport

Ventus Managed NaaS for ATM offers secure, high-availability 4G LTE and wireline connectivity with options to pass traffic directly to your data center or through the Ventus Private Network and out to multiple endpoints. Ventus isolates your ATM network from your branch WAN, increasing security and optimizing traffic distribution.

In addition, Ventus maintains connections into all major financial processors and payment gateway providers, making data transport a truly seamless process. With Ventus Managed NaaS for ATM, financial institutions can deliver the secure, modern banking experience their customers expect.
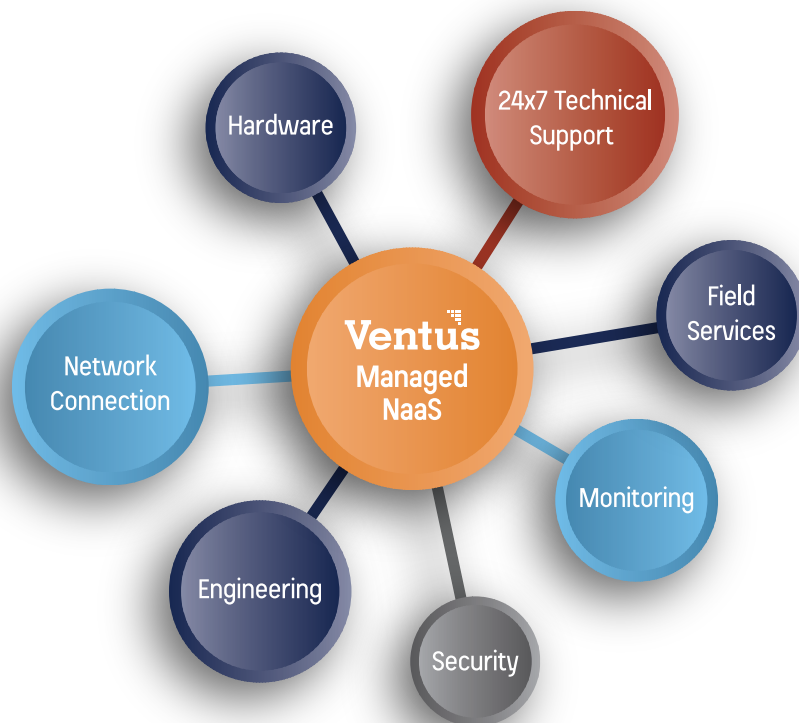

Benefits

- Fully monitored and managed by Ventus
- Simplify your PCI compliance
- Payment gateway connections
- 20+ years ATM industry experience
- Multiple endpoint routing
- Support for alarm panels, check imaging, and more

Why Ventus?

Ventus Managed Network-as-a-Service is an end-to-end platform designed to support your entire ATM portfolio solution. Ventus' knowledgeable and responsive ATM experts and dedicated client care teams handle all the critical details of network management including pre-engineering, hardware provisioning and deployment, network security, continuous monitoring, and 24x7x365 US-based technical support.

Ventus
Global Network Solutions

Managed Network-as-a-Service

Businesses depend on their network to drive applications, improve communication, and better serve customers. Ventus Managed NaaS solutions offer always on connectivity, advanced end-to-end security, and consistent reliability, ensuring distributed enterprises get the most out of their network.

Ventus Managed NaaS solutions are built and managed by Ventus networking experts, ensuring businesses in finance, retail, healthcare, hospitality, and other sectors achieve secure, persistent connectivity for networked applications at distributed branch and office locations. From high-level software-defined networking to mission critical IoT services, Ventus Managed NaaS solutions are scalable to meet specific business needs of any scope.

Managed NaaS solutions are deployed and managed end-to-end, and include pre-configured hardware, dedicated client teams, continuous monitoring, and 24x7 technical support.

Hardware · **24x7 Technical Support** · **Field Services** · **Monitoring** · **Security** · **Engineering** · **Network Connection** · **Ventus Managed NaaS**

Networking experts
Our engineers design and architect a fully integrated network tailored to meet your specific business needs.

Our promise to you
All Ventus managed solutions include dedicated client teams, continuous monitoring, service level agreements, and 24x7 technical support.

Genesis™ Network Monitoring
Ventus' proprietary monitoring platform that offers intelligent device and connection management, maximizing business uptime and efficiency.

Comprehensive coverage
Extensive wireless and fixed line coverage gives your business ultimate connectivity flexibility.

Top applications
- Multiple endpoints
- Branch/Office/Remote location
- ATM/Kiosk/POS
- Digital signage/Video
- IoT/M2M
