Managed Network-as-a-Service

Businesses depend on their network to drive applications, improve communication, and better serve customers. Ventus Managed NaaS solutions offer always on connectivity, advanced end-to-end security, and consistent reliability, ensuring distributed enterprises get the most out of their network.

Ventus Managed NaaS solutions are built and managed by Ventus networking experts, ensuring businesses in finance, retail, healthcare, hospitality, and other sectors achieve secure, persistent connectivity for networked applications at distributed branch and office locations. From high-level software-defined networking to mission critical IoT services, Ventus Managed NaaS solutions are scalable to meet specific business needs of any scope.

Managed NaaS solutions are deployed and managed end-to-end, and include pre-configured hardware, dedicated client teams, continuous monitoring, and 24x7 technical support.

Networking experts

Our engineers design and architect a fully integrated network tailored to meet your specific business needs.

Our promise to you

All Ventus managed solutions include dedicated client teams, continuous monitoring, service level agreements, and 24x7 technical support.

Genesis™ Network Monitoring

Ventus' proprietary monitoring platform that offers intelligent device and connection management, maximizing business uptime and efficiency.

Comprehensive coverage

Extensive wireless and fixed line coverage gives your business ultimate connectivity flexibility.

Top applications

- Digital signage/Video
- Multiple endpoints
- Branch/Office/Remote location
- ATM/Kiosk/POS
- IoT/M2M
